Richmond & Kingston ME Group

Organisation details

Description of activity

Richmond and Kingston ME Group are a support group for people with ME (Myalgic Encephalomyelitis), also known as CFS (Chronic Fatigue Syndrome).

Our mission is to provide support to anyone affected by ME/CFS.

Our purpose is to reduce isolation, provide support and information to our members, reach new members, raise public awareness of ME and its devastating effect on people and their families.

We provide training sessions locally for medical, education, social and other welfare support services to increase understanding of ME.

We are also involved in campaigning for better local and domiciliary services for people with this condition, and in supporting biomedical research into ME.

If you have ME, or know someone who has this condition, you are very welcome to join us.
