The Good Care Group - Live in Care

Organisation details

Description of activity

The Good Care Group provides personalised and professional Live in Care services to you in the comfort of your own home. We are dedicated to providing an exceptionally high quality of care.

Our live in care packages are tailored to each individual, taking time to carefully match our expertly trained live in carers to your needs and personality. This ensures that you not only receive the support you require but also have a friend and companion in your live in carer. It is this approach that has lead The Good Care Group to achieve the highest possible rating from the care quality commission (CQC) and helped us gain more awards and nominations than any other UK home care provider.

Live-in care can be extremely beneficial for young adults with SEND. The flexibility offered by live in care means that you can make the most of opportunities such as gaining part-time or full-time employment or pursuing academic studies at college or university.

The role of a live-in carer for a young adult extends beyond helping the individual themselves; the carer also provides peace of mind and emotional support for the family and friends of the young adult
